github.com/Areeb-1357 • areeb-1357.github.io

PROFILE

First-year AI & ML student at Lords Institute of Engineering and Technology with hands-on experience in front-end projects and rapid prototyping. Interested in Python development, AI-powered applications, and building useful products with a team.

EDUCATION

Lords Institute of Engineering and Technology *2026 – Present*
B.E. Artificial Intelligence & Machine Learning — First Year

TECHNICAL SKILLS

Programming: Python, C (fundamentals)
Web Development: HTML, CSS, JavaScript, Canvas
Tools & Platforms: Git, GitHub, Vercel, GitHub Pages
Currently Exploring: Flask APIs, AI agents, AI/ML application development

HACKATHONS & ACHIEVEMENTS

Winner — AI Arena | College Event *September 2026*
- Won with team The Mavericks (four members) for "Cyber City: Rise of the Wasp Queen", a browser game rapidly prototyped at the event.

PROJECTS

Handsight — Dead Command Center *Hackathon entry*
- Built as an entry to get selected for the campus round of a Microsoft hackathon.

Neon Drift *Completed*
- Browser-based game developed with HTML, CSS, and JavaScript Canvas.
- Practised core game-development concepts: game loop, player input, object handling, collision detection, HUD elements, and visual effects.

Quiz-Quest *Published*
- Browser-based quiz project deployed through GitHub Pages, demonstrating front-end development and web deployment.

Personal Portfolio Website *Published*
- Personal portfolio website hosted at areeb-1357.github.io.

PHANTOM *In planning*
- Cinematic cybersecurity/SOC simulator concept using Python and Flask with a web interface.
- Planned features: simulated attack events, threat-severity scoring, interactive network radar, defensive actions, live analytics, and incident reports.
- Designed as a simulation using fictional events, not real network monitoring.

Safira — AI Travel Companion *Concept*
- AI-assisted travel planner concept for generating destination-based itineraries, with a roadmap for place discovery, routes, weather, and currency information.

AREAS OF INTEREST

AI & Machine Learning • Web Development • AI Agents • Cybersecurity Interfaces • Developer Communities • Hackathons
